### How to read this report?

Funds included under CPFIS are evaluated by the Board's investment consultant. The focus of the due diligence evaluation is to evaluate whether each fund has a reasonably high probability of achieving future out-performance relative to its benchmark. The due diligence covers both qualitative and quantitative aspects of the fund, and is not limited to consideration of past performance.

Please note that the figures shown in the above table are based on the past performance of the fund which may be due to the previous manager and not the current team.

For more information, members could obtain the fund's factsheet from your fund distributor.

### Reminder: Past Performance is not indicative of future results

[For more information, please refer to Performance and Risk Monitoring Reports.](#)

# 'List A' - Funds that have met all new admission criteria:

- i) The revised benchmark set at the top 25 percentile of funds in their global peer group;
- ii) Expense ratio (TER) that is not higher than that set by CPF Board by the respective risk class. The expense ratio criteria will also apply to existing funds from 1 January 2008 onwards;
- iii) From 1 July 2007, sales charges for all CPFIS funds must not exceed 3%;
- iv) In addition, new funds into the CPFIS should preferably have a track record of good performance for at least 3 years.

\* Sharpe Ratio is a measurement of a fund's annualized return that is in excess of the risk-free rate (CPF Ordinary Account interest rate of 2.5%) and adjusted for the fund's volatility. The higher a fund's Sharpe Ratio, the better its returns relative to the amount of risk taken. Please note that in a declining market, Sharpe Ratio could be negative. Members should take a long term view and invest according to their risk profile and retirement needs.

® These funds do not have a 3-year track record under CPFIS yet as they were evaluated for inclusion based on their portfolio track record of comparable strategy.
